## The Smart Solution

- A smart controller with remote monitoring allows for 24/7 access to your site, and dramatically improves response time
- Reduce water use as much as 50% (average 38%)
- Reduce damage from over/under watering
- Minimize liability from hazardous slick spots
- Comply with water restrictions while maximizing watering opportunities and limiting landscape loss
- Improve sustainability through water management
- Creates visibility and accountability through the photo documented inspection tool

TOTAL CONTROL FROM ANYWHERE  
IN THE PALM OF YOUR HAND

# The SmartLink Solution

## SmartLine Controller and Weather Station

- Controller adjusts the amount of water applied daily based on:
  - high/low temperature
  - humidity
  - plant type
  - soil type
  - sprinkler type
  - slope

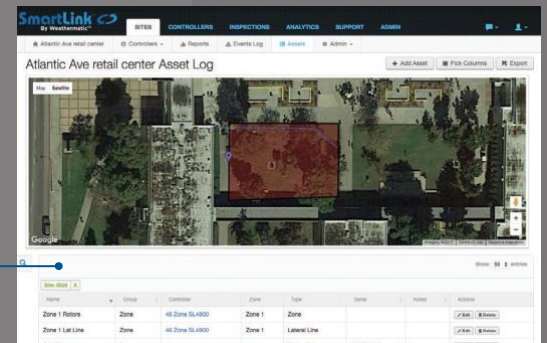

- Weather station set at each controller and communicates wirelessly
- Automatic cycle soak to eliminate run-off
- Never loses date/time or programming due to power failure
- Optionally omit days, times, and dates
- Meets EPA Water Sense Criteria

## SmartLink Software

- Use 3G cellular communication
- Powered by Amazon Cloud Services
- Programming changes can be made remotely from any web enabled device
- In-depth reports of run times and weather data
- Asset tagging and zone mapping
- Web based inspection reports with photo documentation
- Daily alert reporting
- Controller programming backup to the cloud
- All data stored for 5 years
