

WINTER

SPRING

SUMMER

FALL

**There's a reason our grass is always greener.**

As one of Southern California's most reliable and professional landscape management companies, we work hard to assist Mother Nature in Spring, her most active season.

**Mowing**

We trim lawns to the proper length, which allows for deeper, stronger roots, less frequent watering, and a healthier lawn.

**Irrigation**

We inspect and test your system, then repair any leaks or malfunctioning valves and sprinklers.

**Weed Control**

Pre-emergent solutions sprayed directly on lawns and in planting beds target weeds and stop them before they sprout

**Mulching**

Spread in planters and around trees, mulch inhibits weeds, regulates soil temperatures, infuses nutrients into the soil, and conserves water.

**Get Greener grass, shrubs, plants and trees – call New Image today.**
